

# An Urgent Call to Medical Practices

We need people recently diagnosed with infectious or autoimmune disease to donate plasma for research

See reverse side for chart of disease states we urgently need.

- Help support research and manufacturing of diagnostics and therapeutics
- Help your patients financially
- Honorarium to participating practices

The SeraCare Special Donor Program is designed to provide your patient with a private, safe and comfortable donation experience. All donations are taken at FDA-regulated donation centers, with strict adherence to federal HIPAA regulations.

We welcome donors aged 18 to 65, who weigh at least 110 lbs, and are healthy enough to donate plasma.

Donors receive a minimum \$200 per donation, plus expenses.

Referring medical practices receive a \$300 honorarium per patient.

For 25 years, delivering essential biological products and services, advancing diagnostic accuracy, fueling healthcare discovery.

# Disease State Plasma We Urgently Need

Infectious Disease*	Acceptable Donor 1	Acceptable Donor 2	Acceptable Donor 3
Chagas	>5 S/co	Positive test	
Chicken Pox (VZV)	VZV IgM >5 S/co		
CMV	IgM >5 S/co		
EBV/Mono	EBV EA >5 S/co	EBV VCA IgM >5 S/co	Heterophile +
Hepatitis A	IgM >4 S/co	IgM Positive	
Hepatitis B	HBc IgM >4 S/co	HBc Total 1:20,000	HBc Total 1:5,000
Hepatitis C non 1 or 3	rare genotype >10 <sup>6</sup>		
Hepatitis C Type 1 or 3	Infected within last 90 days	PCR Positive; AB Negative	
Hepatitis D, E, or G	Positive/Reactive		
HIV Type 0	Positive/Reactive		
HIV-1	Infected within last 90 days		
HIV-2	Positive/Reactive		
HTLV	>4.0 S/co; 4 bands WB		
Influenza A, B	IgM >5 S/co		
Lyme Disease	IgM >4 S/co	IgG >5 S/co	WB + and ELISA +
Malaria	IgM >5 S/co		
Measles IgM	IgM >5 S/co		
Mumps (parotitis)	IgM >5 S/co		
Mycobac. Tuberculosis	Positive IgM		
Mycoplas. Pneumoniae	3x High Pos cut-off		
Myeloma	>5x Normal		
Parainfluenza 1, 2, 3	IgM >5 S/co		
Parvo B19	Positive DNA or IgM test		
Rubella	IgM >3 S/co		
Syphilis	ATA >1:256	TP-PA Positive	RPR IgM >3 S/co
Toxoplasmosis	IgM >4 S/co	IgM 3x co	
West Nile Virus	IgM >4 S/co		

Autoimmune Disease*	Acceptable Donor 1	Acceptable Donor 2	Acceptable Donor 3
Autoimmune Hepatitis	Smooth Muscle AB 1:640		
Celiac	Gliadin >3 S/co (>100 mg/dL)	Tissue Transglutaminase	
Histone (anti-Histone)	Histone >5.0 (>2x co)		
Lupus/ANA	ANA >100 IU/mL (1:2560)	dsDNA/ssDNA >1,000 IU/mL	JO-1 >6 Index
Parietal Cell	Parietal Cell >1:320 Titer		
Phospholipid (anti-)	IgM >100	β2 Glycoprotein 1 >90 U/mL	Phosphatidyl Serine >100
Rheumatoid Arthritis	RF >2,000 IU/mL	CCP >60 U	
Sjögren's Syndrome	SSb La >8 S/co	Ssa Rho >8 S/co	
Thyroid Disease	TG >4,000 IU/mL	Microsomal TPO >3,000 IU/mL	
TORCH Neg	Toxo/Rubella/CMV/HSV		
Wegener's; Crohn's	C-ANCA >1,000 S/co; 1:160	P-ANCA >1,000 S/co; 1:640	

\*Partial list—other infectious or autoimmune diseases may also be needed. Please inquire.
