## KPL SureBlue<sup>™</sup> TMB Microwell Peroxidase Substrate (1-Component)

PART CODE: LOT NUMBER: SIZE       5120-0077 (52-00-03) 10709695         DESCRIPTION:       This liquid substrate system develops a dark blue soluble product when reacted with horseradish peroxidase labeled conjugates in microwell plates or tubes. It is not recommended for membrane or immunohistochemical staining assays.         FORM/STORAGE:       Liquid. Store refrigerated at 2 - 8°C.         CONTENT:       The one component system is supplied as 1000 mL bottles, from bulk Lot No. 10709695. The KPL SureBlue <sup>IIII</sup> TMB Microwell Peroxidase Substrate (1-Component) contains 3,3',5.5' tetramethyl-benzidine in an acidic bulfer. The concentration of the Hydrogen Peroxide is 0.01%.         STABILITY:       Product is stable for three years from date of manufacture when stored property.         DATE OF MANUFACTURE:       20 JUN 2024         RECOMMENDED REDISPENSING       KPL SureBlue <sup>IIII</sup> TMB Microwell Peroxidase Substrate (1-Component) is extremely sensitive to certain handling and storage conditions. The following suggestions are provided to ensure success when redispensing this product:         • Avoid prolonged exposure to light air or extreme temperatures; however, exposure to indirect laboratory lighting for 24 hours is not harmful.         • Never pipete direcity from bottle. Pour out needed amount into a plastic reservoir. Do not return excess KPL SureBlue <sup>IIII</sup> TM B to the primary container.         • Avoid deposure to Silica-based maternals including borosilicate glass, metals, bacterial contamination or other oxidizing agents. Do not refilter as this may doestabilize the dye complex and result in the development of background color.         • Redispense into a		
peroxidase labeled conjugates in microwell plates or tubes. It is not recommended for membrane or immunohistochemical staining assays.         FORM/STORAGE:       Liquid. The KPL SureBlue™ TMB Microwell Peroxidase Substrate (1-Component) contains 3,3,5,5' tetramethyl-benzidine in an acidic buffer. The concentration of the Hydrogen Peroxide is 0.01%.         STABILITY:       Product is stable for three years from date of manufacture when stored properly.         DATE OF MANUFACTURE:       20 JUN 2024         RECOMMENDED REDISPENSING       KPL SureBlue™ TMB Microwell Peroxidase Substrate (1-Component) is extremely sensitive to certain handling and storage conditions. The following suggestions are provided to ensure success when redispensing this product:         • Avoid prolonged exposure to light air or extreme temperatures; however, exposure to indirect laboratory lighting for 24 hours is not harmful.         • Never pipette directly from bottle. Pour out needed amount into a plastic reservoir. Do not return excess KPL SureBlue™ TMB to the primary container.         • Avoid exposure to silica-based materials including borosilicate glass, metals, bacterial contamination or other oxidizing agents. Do not return excess this may compromise substrate performance.         • HDPE and LDPE bottles should be utilized as they are received directly from the munufacturer, washing of bottles is not recommended.         • HDPE and LDPE bottles should be utilized as they are received directly from the munufacturer, washing of bottles is not recommended.
